

January 2, 2020

Dear Customer,

Restriction of Hazardous Substances (RoHS3)

This letter constitutes our formal certification that the products sold by Slice of Stainless, Inc. comply with the European RoHS3 legislation Directive EU 2015/863 Maximum Concentration Levels. Any traces of cadmium or lead that may be detected are a contaminant in the Compliant Products and levels would be well below 0.01%. Any traces of Mercury found in the Compliant Products would be the result of trace levels present in the base metals as found in the natural environment and tests have shown that any contamination from these sources are significantly less than one part per million.

Regards,

A handwritten signature in black ink, appearing to read "Brandon Tackett", written over a horizontal line.

Brandon Tackett
Vice President
