

January 4, 2022

Dear Customer,

We have received a request for information on products that we supply that may contain chemicals considered as “substances of very high concern” (SVHC) and may also be present on the Restricted Substances List according to the European Union Legislation known as REACH, revised January 19, 2021.

Based on our review of the materials used to manufacture our products, none exceed the SVHC concentration threshold over 0.1% nor are present on the Restricted Substances List per REACH. The stock material we supply does not apply to REACH regulations and we are not consequently required to complete registration paperwork, however, safety data sheets are available per legislative reference EC 1907/2006.

Regards,
